Feel the difference of TEMPUR®

Sleep Innovation
In the 1970's, NASA developed a pressure absorbing material to help cushion and support astronauts during lift-off. Scientists working at what would become TEMPUR production facilities perfected this material for use in sleep products. Today, TEMPUR is the only mattress and pillow brand licensed by the US Space Foundation to use the Certified Technology Seal. TEMPUR builds on its history of innovation by continuing to improve and develop new material and products that deliver the best night’s sleep.

Superior Comfort and Support
Once you have slept on a TEMPUR mattress and pillow, you realise there is no comparison. The TEMPUR temperature-sensitive material conforms to the shape of your body. It reduces the discomfort caused by pressure points by redistributing pressure so you can immediately relax into your most comfortable sleeping position and remain there fully supported. It is this balance of outstanding comfort and superior support that has earned TEMPUR a number 1 ranking for ‘overall customer satisfaction’ and ‘overall quality of sleep’ in each of 12 countries surveyed*.

Trusted Results and Dependable Quality
TEMPUR products are recognised and purchased by hospitals, nursing homes and sleep centres worldwide for the comfort and superior support they provide. Satisfied customers also report that these products have provided comfort when suffering with back, joint and neck problems, as well as sleep difficulties. TEMPUR material is produced solely in company owned production facilities where the products are developed and tested to ensure the highest standards of quality and are all supported by a comprehensive warranty.

Personalised Solutions
With three mattress collections and a range of pillows and complementary products, there is a TEMPUR solution to fit every body. Read more about them in this brochure, or discover what suits you best by simply trying out TEMPUR products for yourself in a store near you.

*The findings are based on interviews with over 5,000 recent mattresses purchasers in 12 European countries (Austria, Denmark, Finland, France, Germany, The Netherlands and Belgium, Italy, Norway, Sweden, Spain, Switzerland and the UK). The percentage of satisfaction is high in each country but not identical.
4 steps to designing your best night’s sleep

1. Mattress selection
   TEMPUR® is not just about being able to sleep on a great mattress, it is also about enjoying the perfect sleep experience and designing a solution that complements your bedroom style. Your ideal TEMPUR bed includes four key elements.
   - The mattress is the most influential factor in determining whether you are comfortably supported at night. As sleeping well is essential for your health and wellbeing, it is important to invest in a good quality mattress that offers the comfort and support that you need. TEMPUR offers a wide range of mattresses with different comfort feels and features, all of which offer superior TEMPUR support. To discover which mattress suits you best, try them out for yourself at a store near you.

2. Pillow choice
   - A good pillow that properly supports your head and neck in a comfortable position is vital to enjoy your best night’s sleep. Review the wide selection of TEMPUR pillows and discover how the various shapes, feels and styles suit different needs and sleep positions.

3. Bed base options
   - A quality bed base can boost the durability and ventilation of your mattress. When selecting a bed base consider which features are important to you. Adjustable models make it easy to read and watch TV in bed, or raise tired legs to lie or sit more comfortably. For the ultimate in relaxation, consider adding features like a massage unit to your bed base.

4. Bed frame design
   - The bed frame is the component that ultimately determines how your bed looks in your room. Our bed frames come in a range of styles and colours to complement your bedroom. Each is constructed using high quality materials and wear resistant fabrics.
TEMPUR® Mattress Collections
A perfect fit for every body

Because everyone’s definition of comfort is different, TEMPUR offers three different mattress collections, each with a distinct feel. Try them and let your body choose.

**TEMPUR® Original**
a supportive, firmer feel

The TEMPUR material was originally developed by NASA to relieve the pressure experienced by astronauts during lift off. It is these pressure-relieving qualities which provide the core benefits of a TEMPUR® Original Mattress – outstanding comfort and support, with a firmer feel.

**TEMPUR® Cloud**
a supportive, softer feel

The TEMPUR® Cloud Mattress Collection offers an innovative balance of softness and support. It combines the unique TEMPUR material with a newly developed, softer, comfort layer for a feeling of instant relaxation.

**TEMPUR® Sensation**
a supportive, traditional feel

The TEMPUR® Sensation Mattress Collection provides the familiar feel of a traditional spring mattress combined with the amazing comfort and support of TEMPUR. All mattresses in this collection have a specially cut, durable base layer for a more traditional feel.

When you lie down on a TEMPUR mattress it conforms to the shape of your body – soft where you want it and firm where you need it™. A TEMPUR mattress will let your body find its most comfortable position and support it there for your best night’s sleep. The TEMPUR material redistributes your body weight and reduces pressure points that on conventional mattresses can lead to numbness and the need to toss and turn during the night. In addition, the properties of TEMPUR material means that partners are less disturbed by each other’s movements and can therefore enjoy a better night’s sleep.

**Maintenance**

Maintaining a TEMPUR mattress is easy. Thanks to the permanent memory of the TEMPUR material, the mattress will return to its original shape every time. As a result, the mattress does not require flipping or turning. The TEMPUR material is hypoallergenic, containing no commonly known allergens, and the mattress covers are antimicrobial treated to inhibit the growth of microorganisms and improve freshness. All covers are certified to meet Oeko-Tex® 100 standards, which means that they have been tested for harmful substances. Many covers can also be easily removed for washing.

*An illustrative guide*

TEMPUR Pillows
Support your head and neck as well as your body

When selecting a pillow, there are a few things you should consider. The first thing you should decide is whether you want a traditional shaped pillow, or a specially shaped pillow.

Specially shaped pillows offer conforming support for different needs and sleep positions, whereas traditionally styled, loose-filled models provide versatile, pillow comfort. If you decide on a specially shaped pillow then keep the following points in mind when selecting your specific model. Specially shaped, formed pillows come in a variety of heights. Typically, the broader your shoulders are, the higher your pillow needs to be. Conversely, the softer your mattress, the more your body will sink down into the bed and the thinner your pillow should be.

Those who like to sleep on their side should select a pillow that provides ample support and proper alignment for their head and neck, and the same factors should be considered for people who sleep on their back. Those who prefer to sleep on their stomachs should select a soft and giving pillow to avoid a backward hyperextension of the neck. Depending on your sleeping position, different pillow shapes will also allow you to lie more comfortably. Whatever your needs, there is a TEMPUR pillow that is right for you. Ultimately, you should try them out and let your body choose.

### EASY MAINTENANCE

Everyone wants to sleep in a clean environment so unlike most mattresses, where the cover is an integrated part of the mattress, the cover on most TEMPUR Mattresses as well as the TEMPUR Pillows can be easily removed to be cleaned or aired. The cover is anti-mite treated and the treatment is an integrated part of the cover. The high density and the permanent memory of the TEMPUR Material allows it to return to its original shape every time. That is why the TEMPUR Mattress never needs to be flipped, rotated or turned.
